

ALLAN MENDOZA ALEMÁN

Full-Stack Software Developer | React · TypeScript · Node.js · PostgreSQL
Managua, Nicaragua (Remote, UTC-6) · allanmaleman@gmail.com · +505 8453 3999
linkedin.com/in/amendoza1890 · github.com/AMendoza180890

PROFESSIONAL SUMMARY

Full-stack developer with 10+ years of experience, including 8 years as Head of Technology at a nonprofit and 5 years with React and TypeScript. Build and maintain production systems for international clients, including an offline-first React Native app for a water utility and a clinic system with column-level encryption and tamper-evident audit logs. Native Spanish speaker working in English, with full overlap with US Central Time.

TECHNICAL SKILLS

Frontend & Mobile: React 19, Next.js, React Native, Expo, TypeScript, JavaScript, Astro (SSR), Vite, Tailwind CSS, Zustand, react-i18next (i18n), responsive design, HTML5/CSS3

Backend: Node.js, PHP, Composer, MVC, RESTful APIs, third-party API integration, Supabase (Auth, Edge Functions, Realtime), Resend (transactional email), Zod

Databases: PostgreSQL (Row-Level Security), Supabase, SQL Server (T-SQL, stored procedures, triggers), MySQL, MongoDB, SQLite

Cloud & DevOps: Vercel, Azure (Blob Storage), Cloudflare (Pages, Workers, Tunnel), Google Cloud Functions, Linux server and network administration, PM2, cron, CI/CD, Git/GitHub

Practices & Leadership: Vitest, PHPUnit (unit testing), SOLID principles, clean code, Git flow and pull requests, technical leadership, requirements gathering, stakeholder communication, estimation

Architecture & Security: multi-tenant architecture, role-based access control (RBAC), column-level encryption, hash-chained audit logs, idempotent payment processing, optimistic locking, vulnerability scanning

Languages: Spanish (native), English (upper-intermediate, B2)

PROFESSIONAL EXPERIENCE

Independent Full-Stack Developer (Contract) | Remote

2025 – Present

EMAPASMOSA S.A. · *AquaRed, water meter reading app* · 2026 – Present | *React Native, Expo, SQLite, Azure*

- Built and maintain an offline-first mobile app used daily in production by 15 field readers to record water meter readings with photo evidence.
- Designed a local SQLite database with background sync and a two-phase upload (readings first, then photos to Azure Blob Storage) that prevents data loss on unstable connections.

Fisioterapia TERAFFIS · *Clinic management system* · 2026 – Present | *Next.js, Supabase, PostgreSQL, Vitest*

- Built and maintain a production management system for a physiotherapy clinic, covering patient records and payments.
- Implemented column-level encryption for sensitive patient data, append-only audit logs with hash chaining for tamper evidence, and idempotent payment processing, covered by unit tests in Vitest.

TGC – Think Global Consultants (US-led, Malaysia) · *Multi-tenant survey platform* · 2026 | *React, Astro SSR, TypeScript, Supabase, PostgreSQL*

- Architected and built a multi-tenant survey platform used by 3 organizations, with data isolation enforced through PostgreSQL Row-Level Security and role-based access for platform admins and organization users.
- Automated survey distribution with pg_cron scheduling, Supabase Edge Functions, and transactional email, plus real-time assignment tracking with Supabase Realtime.

SC Medical Clinic (Da Nang, Vietnam) · *Trilingual website* · 2026 · *phongkhamsc.com* | *React, Vite, TypeScript, Tailwind CSS*

- Delivered a Vietnamese/English/Korean website (react-i18next) for a clinic group offering dental and medical services, integrating Google Maps and Zalo, deployed on Cloudflare Pages with automatic deploys from GitHub.

Hosting & DevOps · *Production infrastructure* · 2025 – Present | *Linux, PM2, Cloudflare, Vercel*

- Manage a production Linux server that runs multiple client projects with PM2, cron jobs, and Cloudflare Tunnel, and deploy through CI/CD to Vercel and Cloudflare.

Full-Stack Developer (Part-time) | WebxNi · Managua, Nicaragua

2018 – Present

Part-time alongside Tesoros de Dios until 2023; ongoing project support since.

- Built React/TypeScript web applications and websites for small-business clients (2021 – 2025), alongside PHP projects.

- Built a vulnerability-scanning web application (Astro, React 19, TypeScript, Tailwind CSS, Node.js, Supabase, Resend) that audits WordPress sites for outdated libraries and vulnerable APIs and emails remediation recommendations to site owners.
- Delivered 10 production websites and web systems for clients as a full-stack developer, using PHP, JavaScript, HTML5/CSS3, and MySQL, with Composer libraries including dompdf (PDF generation), phpdotenv (environment configuration), and PHPUnit (unit testing).
- Built a service-request management system (PHP, MySQL) that streamlined client communication and internal operations.

Head of Technology | Tesoros de Dios (nonprofit organization) · Managua, Nicaragua **2015 – 2023**

- Led the technology function, coordinating a team of 1–3 people and administering network infrastructure and systems for 30 users.
- Built the organization's website and a virtual library platform (PHP, MySQL, MVC) serving 30 users with content for partner churches, including an admin panel for user and content management, deployed on Bluehost.
- Managed SQL Server databases, including queries, reports, stored procedures, and triggers.

VOLUNTEER EXPERIENCE

Volunteer Web Developer · Remote collaboration with organizations in Cambodia and Malaysia

EDUCATION & CERTIFICATIONS

B.S. in Computer Engineering (Ingeniería en Computación) · Universidad de Managua

HackerRank SQL (Basic) and SQL (Intermediate) · Foundational C# with Microsoft (freeCodeCamp)
